Art Unit: 1712

1. The election with traverse of Group II in the reply filed on May 15, 2006 is acknowledged. The traversal is on the ground that the simultaneous examination of the inventions does not impose an undue burden of examination. This is not found persuasive because the separate classifications of the inventions set forth on page 2 of the restriction and election of species requirement mailed April 21, 2006 confirms an undue search burden.

The requirement is still deemed proper and is therefore made FINAL.

Accordingly, claims 1-9, 11, 21 and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim.

- 2. The election of the species of diglycidyl ether of bisphenol A as epoxy resin (A) and the reactants dithioglycidyl ether of bisphenol A and diethylenetriamine for compound (B) conforming to formula la according to the description of the reactants provided on page 5, the last paragraph of the specification is acknowledged.
- 3. The subject matter of new claims 21-25 presented in the amendment filed May 15, 2006 is supported by pages 10-11 of the specification.
- 4. The word "And" in the last line of claim 10 should not be capitalized.

Art Unit: 1712

5. The denotation wherein when X is -CHR₄, "R₃ and R₄ together form an ethylene group" on page 1, the last line and page 2, line 2 of the specification as well as in independent claim 10, lines 10 and 12 is understood to indicate the radical "-CH-CH₂CH₂CH- forming a ring with the remainder of the moiety -C(SH)(R₁)-CH_{2-.}

Page 3

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10, 12, 13, 15-20 and 23-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 10, 12, 13, 15-20 and 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. R₄ of -CHR₄- in X of formulae (Ia) and (Ib) is solely denoted as forming an ethylene group with R₃ of the radical -CHR₃-. However, R₄ is undefined when R₃ is hydrogen since R₄ cannot form an ethylene group with R₃ when R₃ is hydrogen.

Application/Control Number: 10/815,532 Page 4

Art Unit: 1712

Claims 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. There is no antecedent basis in independent claim 10 for the amine equivalents of polyamine (C) since claim 10 does not require the presence of a polyamine (C) as denoted in claim 11.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 10, 12, 13, 17-19 and 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cameron Patent No. 3,394,098 and Levine Patent No. 3,548,002.

8. Cameron (col. 6, Example VI) shows a mixture of the elected species of the diglycidyl ether of bisphenol A (Epoxy Resin A described in Example I in column 6, lines 7-8) and the reaction of excess ethylene diamine with propylene sulfide (Flexibiliser F set forth in column 5, lines 54-67) within the ambit of claimed compound (B) of formula (Ib) prepared by the reaction of a monoepisulfide with a polyamine according to page 6, the last paragraph to page 7, line 2 of the specification.

Application/Control Number: 10/815,532 Page 5

Art Unit: 1712

9. Levine (col. 4, Example 8) shows a glycerol-modified diglycidyl ether of bisphenol A blended with the reaction product of excess ethylene diamine with propylene sulfide (Example 1, col. 2, lines 12-24) within the limits of claimed compound (B) of formula (Ib) for the same reasons espoused in the previous paragraph.

- 10. Although the structures of the reaction products of Cameron and Levine are not depicted, based on the equivalent reactants employed with an excess of the ethylene diamine would yield a structure within claimed formula (lb).
- 11. None of the prior art recites claimed compound (B) of formula (Ia). More favorable consideration would be given to the limitation of X in formula (Ib) to exclude -CHR₄ and its formation of an ethylene group with R₃.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Sellers whose telephone number is (571) 272-1093. The examiner can normally be reached on Monday to Friday from 9:30 to 6:00. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at (866) 217-9197 (toll-free).
